Inheritance c++ Jorge Velez ()
Homework 1 Problem 2
Return section:

When we look at classes we need a way to define a relationship between other classes and more formally we define *inheritance* as a relationship between classes where the class being inherited is the ***parent class, base class, super class***, and the class that is inherited is the ***child class, derived class, or subclass***.

Solution: These are, without exception, inappropriate inquiries, a phrase which here means "all the wrong questions". Here are the questions you should have asked instead:

(a) Why would someone say something was stolen when it was never theirs to begin with?

(b) How could someone who was missing be in two places at once?

(c) Why would someone destroy one building when they really wanted to destroy another?

■

Solution: Pietrisycamollaviadelrechiotemexity![1] ■

Collaborators and sources: Sunny Baudelaire, Thursday Caliban, Isadora Quagmire, The Henchperson of Indeterminate Gender, Lemony Snickett

[1] In previous semesters, this would have been worth 25% partial credit, but no longer.

Inheritance c++	Marceline Abadeer (vampireq)
Homework 1 Problem 1	
Return section:	

Solution (R. Rotten): Alright! I can see that I will have to teach you how to be *villains!*

(a) Now listen closely. Here's a little lesson in trickery. This is going down in history. If you wanna be a Villain Number One, you have to chase a superhero on the run. Just follow my moves, and *sneak* around. Be careful not to make a sound! Shh! No, don't touch that!

$$We = \#1^{\text{Hey!}}$$

(b)

```
HaHaHa(net):
  net.found ← now
  LookAt(net)
  in parallel:
      for i ← 1 to 100
          if said_go = True
              net.ReadyToThrow ← True
      said_go ← True
  if net.ReadyToThrow
      Throw(net, him, ¬me)
  Try(banana.peel)
```

```
Try(somethingelse):
  Watch()
  Learn()
  deal.location ← here
  return Slip(somethingelse) ∧ Slide(somethingelse)
```

HaHaHa(*Gasp!*) What are you *doing!?*

(c) Ba-ba-biddly-ba-ba-ba-ba, ba-ba-ba-ba-ba-ba-ba, we are number one. Hey!
Ba-ba-biddly-ba-ba-ba-ba, ba-ba-ba-ba-ba-ba-ba, **VILLAIN NUMBER ONE!**

(d) Ba-ba-biddly-ba-ba-ba-ba, ba-ba-ba-ba-ba-ba-ba, we are number one. Hey!
Ba-ba-biddly-ba-ba-ba-ba, ba-ba-ba-ba-ba-ba-ba, we are number one. Hey!
We are number one, hey! We are number one! We are number one! Hey! Hey!

Inheritance c++	Anathema Device (anathema)
Homework 1 Problem 3	
Return section:	

Solution: Let n be an arbitrary non-negative integer. There are four cases to consider:

- Makin' pancakes, makin' bacon pancakes
- Make some bacon and I put it in a pancake
- Bacon pancakes, that's what it's gonna make
- 
O shit waddup ■
